VINCOTECH'S NEW HIGH-SPEED 1200 V SIXPACK MODULE FAMILY -- The sixpack modules to increase customers application's speed and efficiency--

Unterhaching, Germany, October 12, 2017. Vincotech, a supplier of module-based solutions for power electronics, today announced the launch of a new 1200 V sixpack family - *flowPACK 1* and *flowPACK 2* - featuring high-speed IGBT4 technology for reduced switching losses. These modules are the perfect fit for servo applications and line converters for elevator drives demanding switching frequencies up to 16 kHz.

The new three-phase sixpack inverter modules feature optimized high-speed IGBTs and soft-switching diodes. The new *flowPACK 1* and *flowPACK 2* modules can drive up to 150A and their improved efficiency will also help reduce systems costs.

Both modules are packaged in the low-inductive standard *flow 1* and *flow 2* housing, and are available with optional phase-change material.

To learn more about Vincotech's *flowPACK 1* and *flowPack 2*, please visit:

ABOUT VINCOTECH

Vincotech is a market leader in power semiconductor modules. An group company of Mitsubishi Electric Corporation, the company excels at developing and manufacturing high-quality electronic power components for motion control, renewable energy, and power supply markets. Vincotech understands customers' needs and furnishes both off-the-rack and applications-specific solutions to ensure they are met.

Tapping the considerable engineering and electronics integration skills and experience of some 800 employees worldwide, the company collaborates with the customer to develop the best solution for the given application. And Vincotech's workforce embraces the principle of reliable partnership to deliver on its performance promise of speed and flexibility to customers' best benefit.
