### **VINCOTECH AT PCIM – EMPOWERING YOUR IDEAS**

-- Vincotech to present GaN and other advanced technologies at the PCIM tradeshow in hall 7, stand 469, in Nuremberg, Germany --

**Unterhaching, Germany – June 7, 2024.** Vincotech, a supplier of module-based solutions for power electronics, is returning to PCIM, the world's leading power electronics expo and conference to showcase its latest technologies and innovations, including GaN and many more products for Motion Control, Renewable and Power Supply use cases. In keeping with this year's expo slogan "Empowering your ideas," the company's application-specific capabilities will be on prominent display.

Highly anticipated, PCIM Europe event is sure to draw thousands of visitors, and Vincotech is thrilled to be back. "Our fair booth will feature all kinds of new tech, and we can't wait to show customers and prospects how our solutions benefit their business. Hot topics, innovations, donations – expect all that and more", says Edoardo Guiotto, VP Sales and Marketing.

This year's big talking point is the company's commitment to **application-specific solutions** enabled by a wide range of industry-standard and proprietary housings, multi-source chipsets, expedited time-to-market, and early sample availability. Highlights include a solution for [SEW-EURODRIVE](#), showcased with a station displayed at the booth.

**One spotlight will be on GaN**, a cutting-edge technology that has the industry abuzz. Vincotech, which is driving advances on this front, is going to demonstrate the potential, benefits, and applications of GaN in power modules.

**Innovations in motor control applications** will also figure prominently. Reliability and performance packed into a small footprint – that's what sophisticated motor control use cases need.

Highly integrated and engineered to support complex electrical and thermal designs, Vincotech's embedded drive solutions meet these demands. For Industrial drives the tandem diode solutions are available for SixPack, Twin SixPack and PIM topologies including custom and industry standard power module housings.

**Renewables are on the rise.** Built on decades of experience in solar, Vincotech's extensive portfolio of PV & ESS solutions is second to none. Residential, industrial, commercial – every use case and power range is well-covered.

**Leading the way in power supply,** Vincotech offers outstanding power module solutions. Highlights in DC fast charging include a built-to-boost 3-phase resonant converter, the fastPACK 1 GaN 2-in-1 featuring advanced Wide Bandgap (WBG) tech, and many ultra-compact, integrated solutions and low inductive modules. Enhancing the performance of Uninterruptible Power Supplies (UPS), Vincotech has a wide range of solutions from 20kW – 250kW power.

Like in previous years, Vincotech teams up with [Plan International Germany](#), bringing an exciting VR experience to the event. Visitors can challenge themselves by flying over the mountains in virtual reality, while knowing their participation supports a greater good. Vincotech will match all flights with a donation, targeting a Plan International project for teenagers in Ecuador.

Vincotech's PCIM presentations at a glance:

### **Tuesday, June 11**

11:15     Exhibitor forum  
David Chilachava: NEW FastPACK 1 GaN – The Best Utilization of GaN Technology Benefits in an Industrial Power Module Package

### **Wednesday, June 12**

11:20     Bodo's panel discussion on "SiC Wide Bandgap Design, the Future of Power")  
Evangelos Theodossiu: SiC power module design: Why does it matter?  
14:30     Conference, Room: München 2  
A joint presentation with Siemens: Optimizing a Power Module for Electrical and Thermal Performance and Symmetry Using EDA Tools

### **Thursday June 13**

11:15     Conference poster sessions  
Tiago Jappe: Power Module Solutions with Improved Reliability for Elevator Drive Applications  
14:35     Exhibitor forum  
Matthias Tauer: flow E3 Full SiC Power Module with Direct Pressed Substrate for Superior Thermal Performance and Reliability

Visit the Vincotech booth in hall 7, stand 469, at this year's PCIM show from June 11 through 13 to explore and experience all this – and much more.

## **ABOUT VINCOTECH**

Vincotech, a Mitsubishi Electric Corporation company, designs and manufactures electronic power components. A global market leader in power semiconductor modules, Vincotech understands customers' needs and delivers both off-the-shelf and made-to-order solutions to meet their demands for motion control, renewable energy, and power supply use cases.

The enterprise's corporate philosophy and strategy are rooted in the conviction that sustainable technologies are the answer to many of the challenges posed by global megatrends. Capitalizing on the 900-strong global workforce's stellar electronic engineering and integration skills, Vincotech empowers customers to develop clean, efficient and affordable solutions. Everything the company does is done with the future in mind, to customers' best benefit, and in keeping with its corporate motto, "Fast and Flexible."
